(A) Bland-Altman agreement
n = 234 discs (78 patients)
MAE = 1.51 mm
Bias = +0.05 mm
95% LoA = [-3.87, +3.97] mm
Predicted - reference (mm)
Mean of reference and predicted height (mm)
(B) r = 0.54, CCC = 0.50, ICC(A,1) = 0.50
Identity
Least-squares fit
Predicted height, axial T2w (mm)
Reference height, mid-sagittal T2w (mm)
